Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

- 1. Claims 1-20 recite, among other things, a method for determining the amount of charge which can be drawn from a storage battery, comprising the step of calculating characteristic values from quotients of the voltage differences and the current differences; utilizing the characteristic values for a time interval to determine an interval characteristic value; and determining of the amount of charge which can be drawn from the storage battery from at least one interval characteristic value for at least one time interval. The art of record does not teach, disclose or suggest the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations.
- 2. Claim 21 recites, among other things, a monitoring device for a storage battery comprising a measurement component and an evaluation component to calculate a characteristic values from quotients of the voltage differences and the current differences; utilizing the characteristic values for a time interval to determine an interval characteristic value; and determining of the amount of charge which can be drawn from the storage battery from at least one interval characteristic value for at least one time interval. The art of record does not teach, disclose or suggest the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
